UK

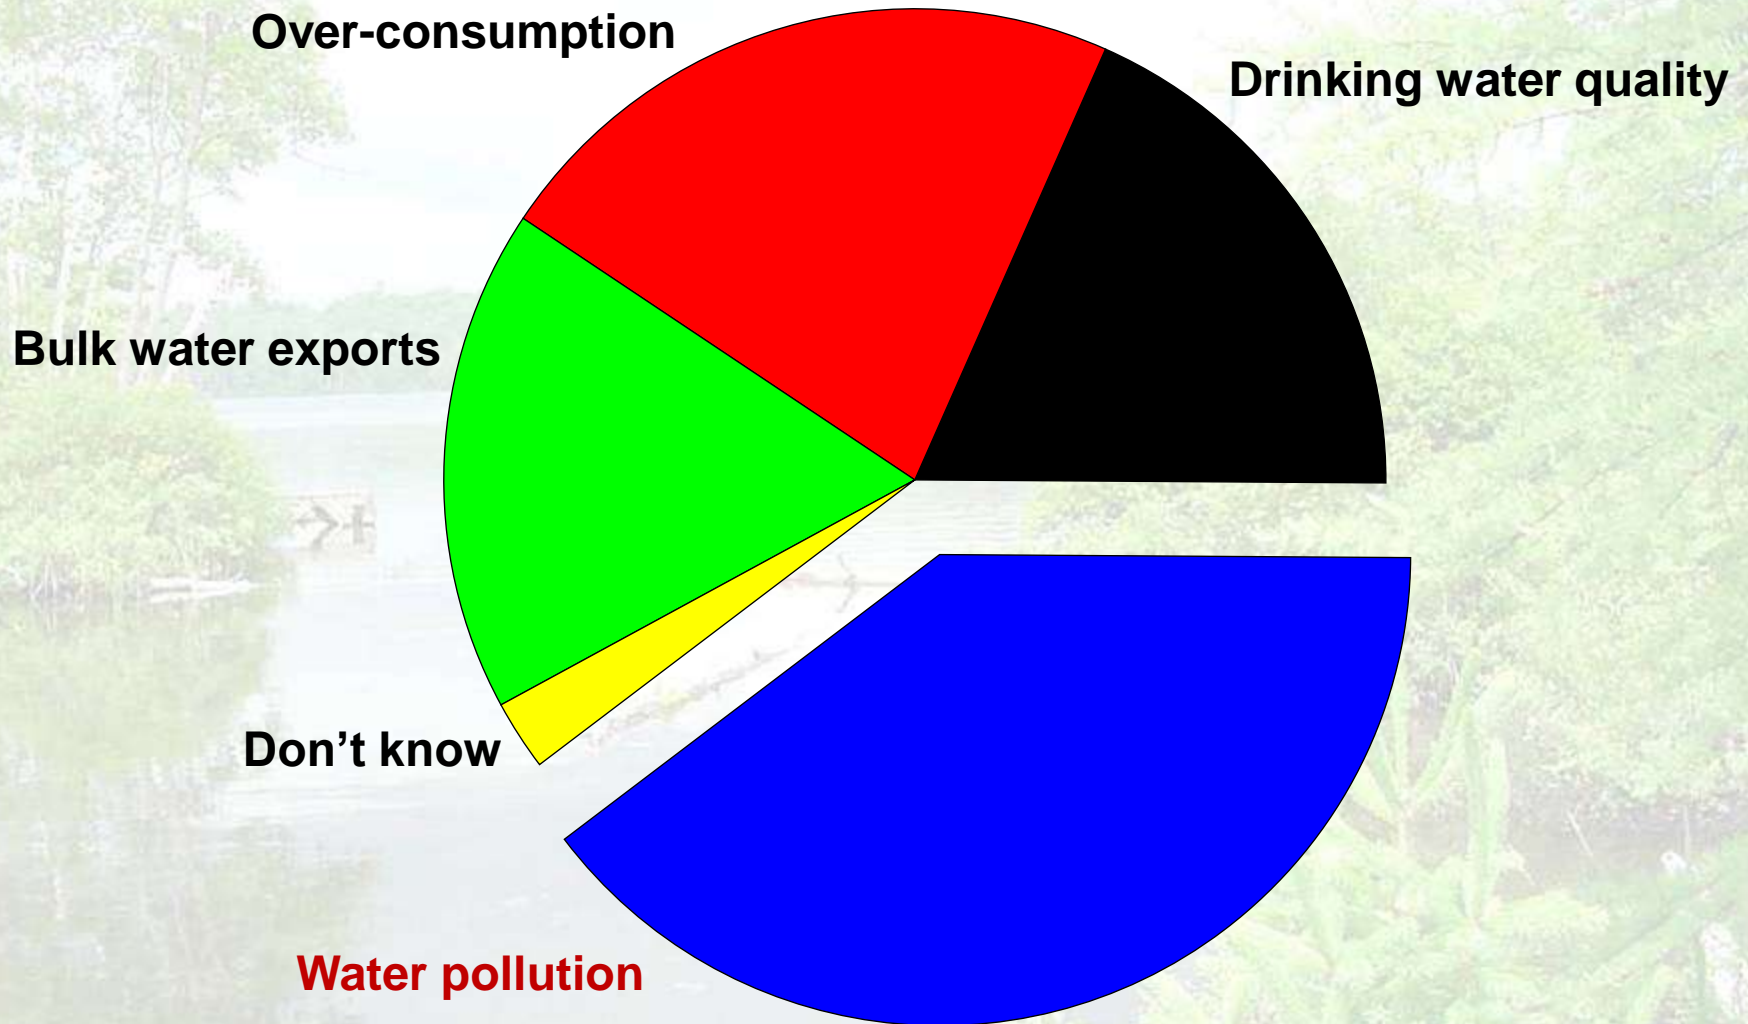

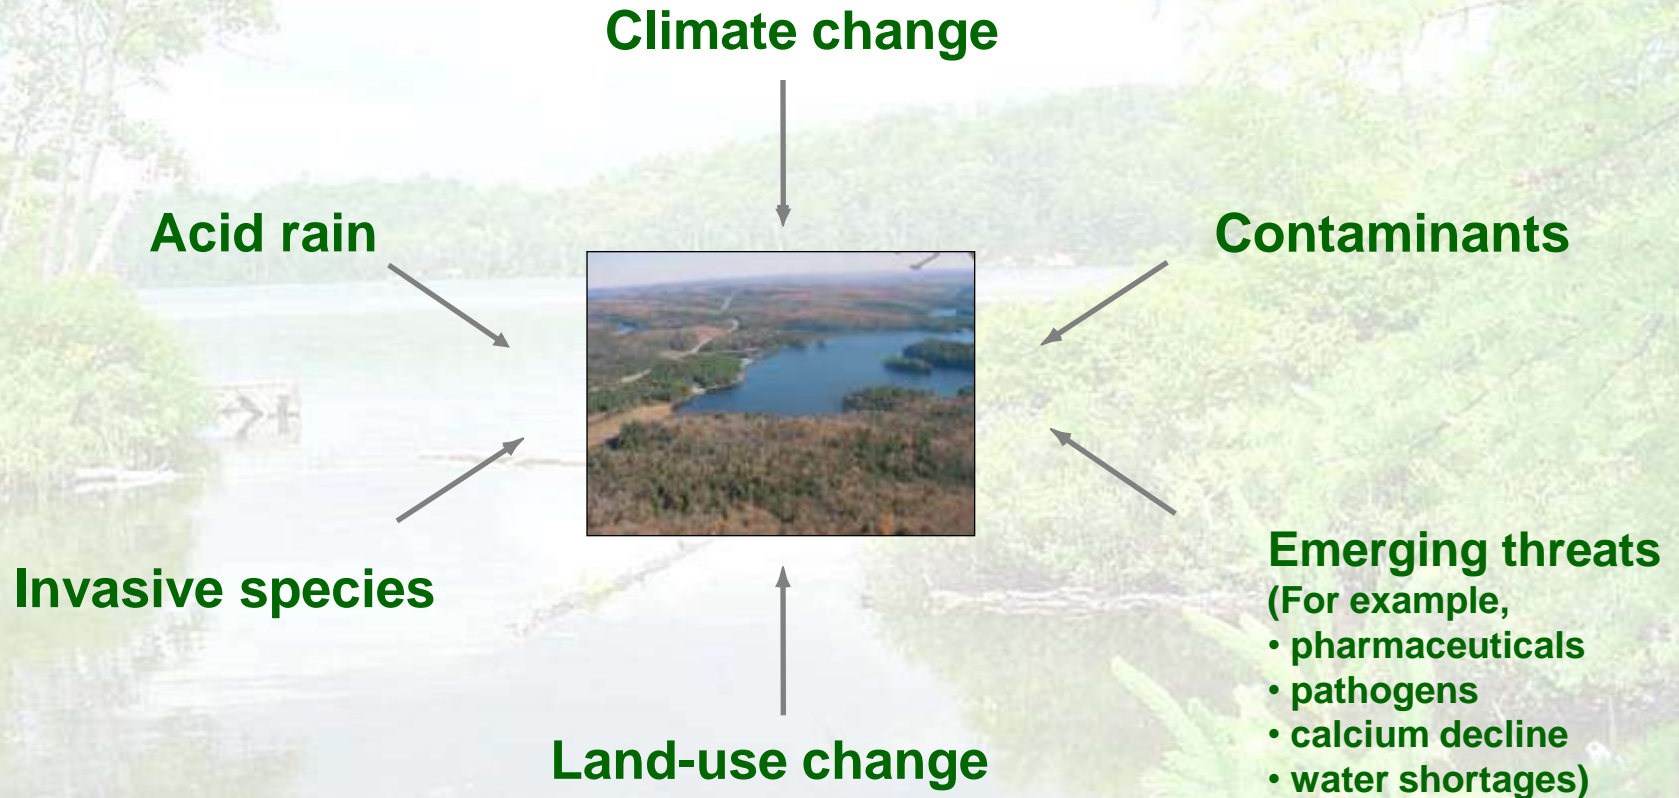

Which natural resource is most important to Canada's future?

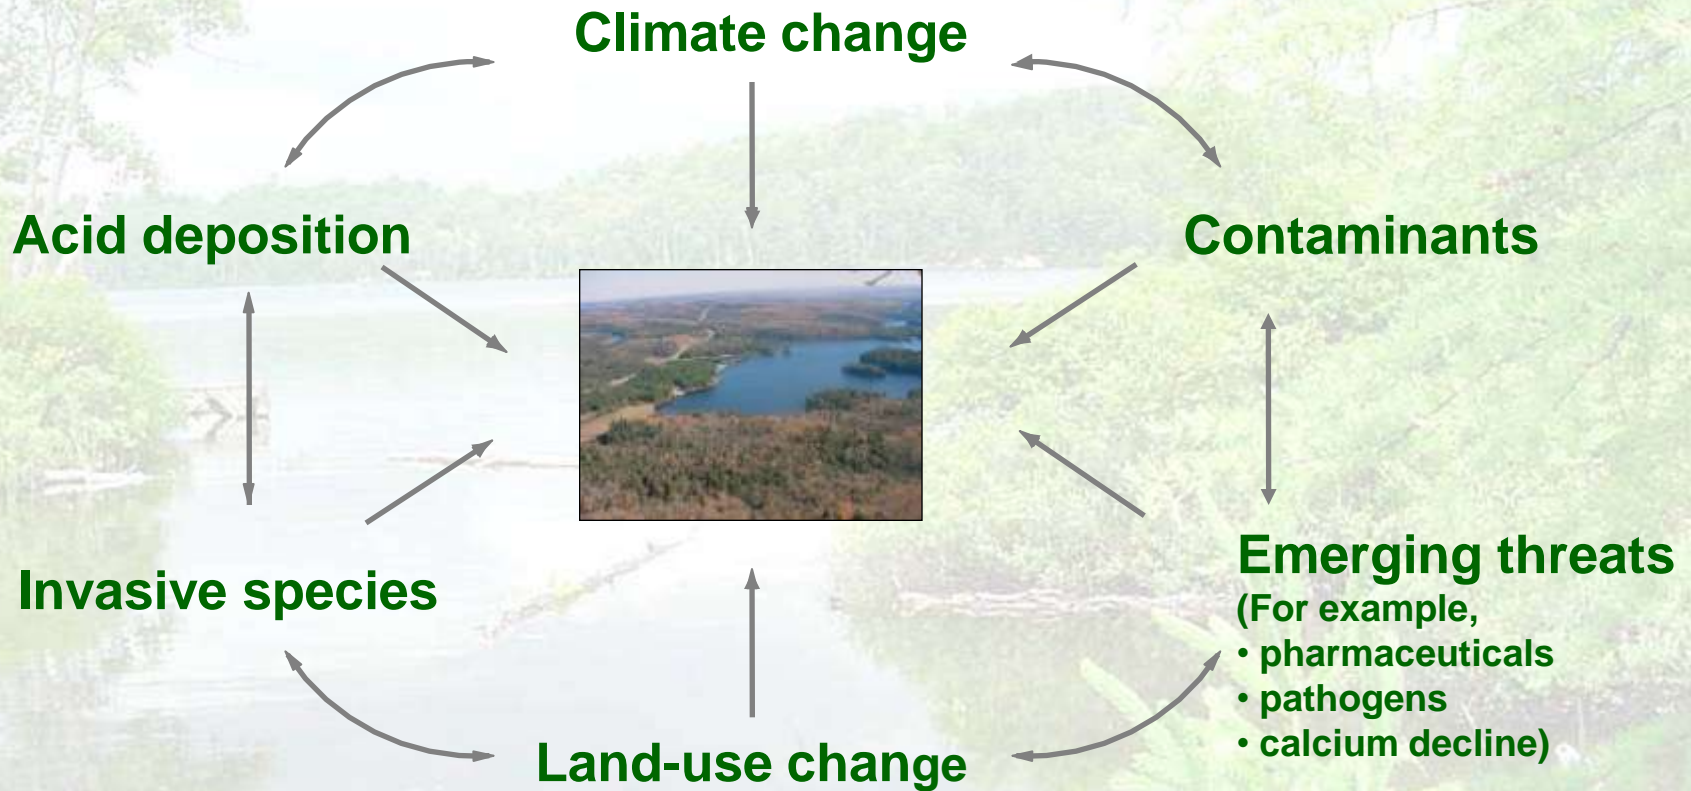

What is your greatest concern regarding freshwater in Canada?

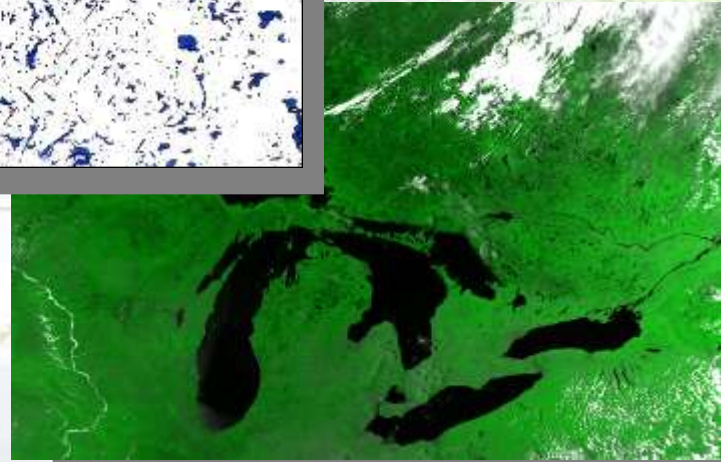

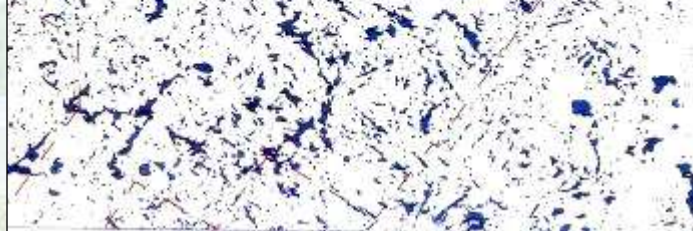

Multiple threats to freshwater

Management in an increasingly complex world...

Decisions

at all

scales

...with a broad set of challenges

**No overarching
national strategy
for management
of water**

Competing uses

Financial constraints

Shifting priorities

Jurisdictional complexities

Knowledge gaps

Freshwater Summit 2010: Objectives

- to share information on past, present and future threats to freshwater nationally (environmental, socio-economic, political)
 - **six keynote speakers**
- to discuss and debate ideas for improving management of freshwater in Canada
 - **panel discussion with public input and questions**
- collectively, to develop a communiqué with clear recommendations for improving management of our shared freshwater resource
 - **a summary to be circulated to participants for comment and then presented to the federal government before the G8 Summit**

Day 2: Panel Discussion

“How would you improve management of freshwater in Canada?”

Youth Summit

40 students from 7 local high schools will prepare their own communiqué

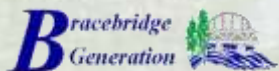

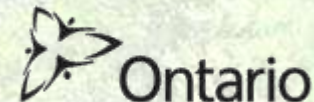

With assistance from:

- Nipissing University Faculty of Education
- Laurentian University / Science North Graduate Diploma in Science Communication
- many dedicated teachers and volunteers
